

FINDINGS (1)

An outdated compiler version is used.

`pragma solidity 0.4.25;`

An outdated compiler version is used. The compiler version specified in the pragma directive may have known bugs. It is recommended to use the latest minor release of solc 0.5 or 0.6. For more information on Solidity compiler bug reports and fixes refer to <https://github.com/ethereum/solidity/releases>

CONCLUSION

- Contracts have high code readability
- Gas usage is optimal
- Contracts are fully BSC compatible
- No backdoors or overflows are present in the contracts
